NORTH-HOLLAND

SUBJECT INDEX OF VOLUME 73*

Boundary element methods

A self-adaptive *h*-refinement technique for the boundary element method, J.J. Rencis and K.-Y. Jong (3) 295–316

Calculus of variations

Stress analysis of finite interfacially cracked bimaterial plates by using the variational method, W.-C. Wang and J.-T. Chen (2) 153–171

Coupled problems

Hermes space shuttle: exploration of reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (1) 1–51

Dynamics

An Element Eigenvalue Theorem and its application for stable time steps, J.I. Lin (3) 283–294

Elasticity

A theoretical and numerical finite element analysis of spatial rod systems, M. Farshad, G. Karami and M.R. Banan (2) 111–132
Stress analysis of finite interfacially cracked bimaterial plates by using the variational method, W.-C. Wang and J.-T. Chen (2) 153–171
A combined method for solving elliptic problems on unbounded domains, Z.-C. Li (2) 191–208

Finite element and matrix methods

Hermes space shuttle exploration of reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (1) 1–51

* The issue number is given in front of the page numbers.

A variational formulation for the generalized Galerkin method for the convection-diffusion equation, P. Smolinski (1) 93 – 98
On a stress resultant geometrically exact shell model. Part II: The linear theory; computational aspects, J.C. Simo, D.D. Fox and M.S. Rifai (1) 53 – 92
A theoretical and numerical finite element analysis of spatial rod systems, M. Farshad, G. Karami and M.R. Banan (2) 111 – 132
Analysis of stiffened shear-flexible orthotropic panels, D. Karamanlidis and V. Agrawal (2) 133 – 146
Vectorizing the right-hand side assembly in an explicit finite element program, D.J. Benson (2) 147 – 152
A new finite element formulation for computational fluid dynamics: VIII. The Galerkin/least-squares method for advective-diffusive equations, T.J.R. Hughes, L.P. Franca and G.M. Hulbert (2) 173 – 189
A combined method for solving elliptic problems on unbounded domains, Z.-C. Li (2) 191 – 208
Large-deflection analysis of shell structure by using corotational total Lagrangian formulation, K.-M. Hsiao and H.-C. Hung (2) 209 – 225
A finite element method for analyzing localization in rate dependent solids at finite strains, A. Nacar, A. Needleman and M. Ortiz (3) 235 – 258
On the mixed formulation of a 9-node Lagrange shell element, T.Y. Chang, A.F. Saleeb and W. Graf (3) 259 – 281
An Element Eigenvalue Theorem and its application for stable time steps, J.I. Lin (3) 283 – 294
A self-adaptive formulation for the Euler/Navier – Stokes coupling, F. Brezzi, C. Canuto and A. Russo (3) 317 – 330
Finite element formulation for the vorticity-stream function form of the incompressible Euler equations on multiply-connected domains, T.E. Tezduyar (3) 331 – 339
On the convergence of the mixed method of Crochet and Marchal for viscoelastic flows, M. Fortin and R. Pierre (3) 341 – 350

Fluid mechanics

Hermes space shuttle exploration of reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (1) 1 – 51
A variational formulation for the generalized Galerkin method for the convection-diffusion equation, P. Smolinski (1) 93 – 98
A new finite element formulation for computational fluid dynamics: VIII. The Galerkin/least-squares method for advective-diffusive equations, T.J.R. Hughes, L.P. Franca and G.M. Hulbert (2) 173 – 189
A self-adaptive formulation for the Euler/Navier – Stokes coupling, F. Brezzi, C. Canuto and A. Russo (3) 317 – 330
Finite element formulation for the vorticity-stream function form of the incompressible Euler equations on multiply-connected domains, T.E. Tezduyar (3) 331 – 339

Fracture mechanics

Stress analysis of finite interfacially cracked bimaterial plates by using the variational method, W.-C. Wang and J.-T. Chen (2) 153 – 171

Gas dynamics

Hermes space shuttle exploration of reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (1) 1 – 51

General Rayleigh-Ritz and Galerkin techniques

Analysis of stiffened shear-flexible orthotropic panels, D. Karamanlidis and V. Agrawal (2) 133 – 146

A combined method for solving elliptic problems on unbounded domains, Z.-C. Li (2) 191 – 208

Nonlinear mechanics

Large-deflection analysis of shell structure by using corotational total Lagrangian formulation, K.-M. Hsiao and H.-C. Hung (2) 209 – 225

Numerical solution procedures

A new finite element formulation for computational fluid dynamics: VIII. The Galerkin/least-squares method for advective-diffusive equations, T.J.R. Hughes, L.P. Franca and G.M. Hulbert (2) 173 – 189

An Element Eigenvalue Theorem and its application for stable time steps, J.I. Lin (3) 283 – 294

A self-adaptive formulation for the Euler/Navier – Stokes coupling, F. Brezzi, C. Canuto and A. Russo (3) 317 – 330

Optimization and design of structures

A simple computer-aided design procedure for minimal variations, H. Chang (1) 99 – 107

Plasticity

A finite element method for analyzing localization in rate dependent solids at finite strains, A. Nacar, A. Needleman and M. Ortiz (3) 235 – 258

Shells and plates

On stress resultant geometrically exact shell model. Part II: The linear theory; Computational aspects, J.C. Simo, D.D. Fox and M.S. Rifai (1) 53 – 92
Analysis of stiffened shear-flexible orthotropic panels, D. Karamanlidis and V. Agrawal (2) 133 – 146
Large-deflection analysis of shell structure by using corotational total Lagrangian formulation, K.-M. Hsiao and H.-C. Hung (2) 209 – 225
On the mixed formulation of a 9-node Lagrange shell element, T.Y. Chang, A.F. Saleeb and W. Graf (3) 259 – 281

Singularity methods

A combined method for solving elliptic problems on unbounded domains, Z.-C. Li (2) 191 – 208

Structural mechanics

A theoretical and numerical finite element analysis of spatial rod systems, M. Farshad, G. Karami and M.R. Banan (2) 111 – 132
Analysis of stiffened shear-flexible orthotropic panels, D. Karamanlidis and V. Agrawal (2) 133 – 146
A finite element method for analyzing localization in rate dependent solids at finite strains, A. Nacar, A. Needleman and M. Ortiz (3) 235 – 258

Supersonic flow

Hermes space shuttle: exploration of reentry aerodynamics, J. Argyris, I.St. Doltsinis and H. Friz (1) 1 – 51

Transport phenomena

A new finite element formulation for computational fluid dynamics: VIII. The Galerkin/least-squares method for advective-diffusive equations, T.J.R. Hughes, L.P. Franca and G.M. Hulbert (2) 173 – 189

Viscoelastic and viscoplastic media

On the convergence of the mixed method of Crochet and Marchal for viscoelastic flows, M. Fortin and R. Pierre (3) 341 – 350

Viscous flow

A self-adaptive formulation for the Euler/Navier – Stokes coupling, F. Brezzi, C. Canuto and A. Russo (3) 317 – 330
